

Quick Start Guide for Undergraduate and Taught Post Graduate Students: Research Ethics

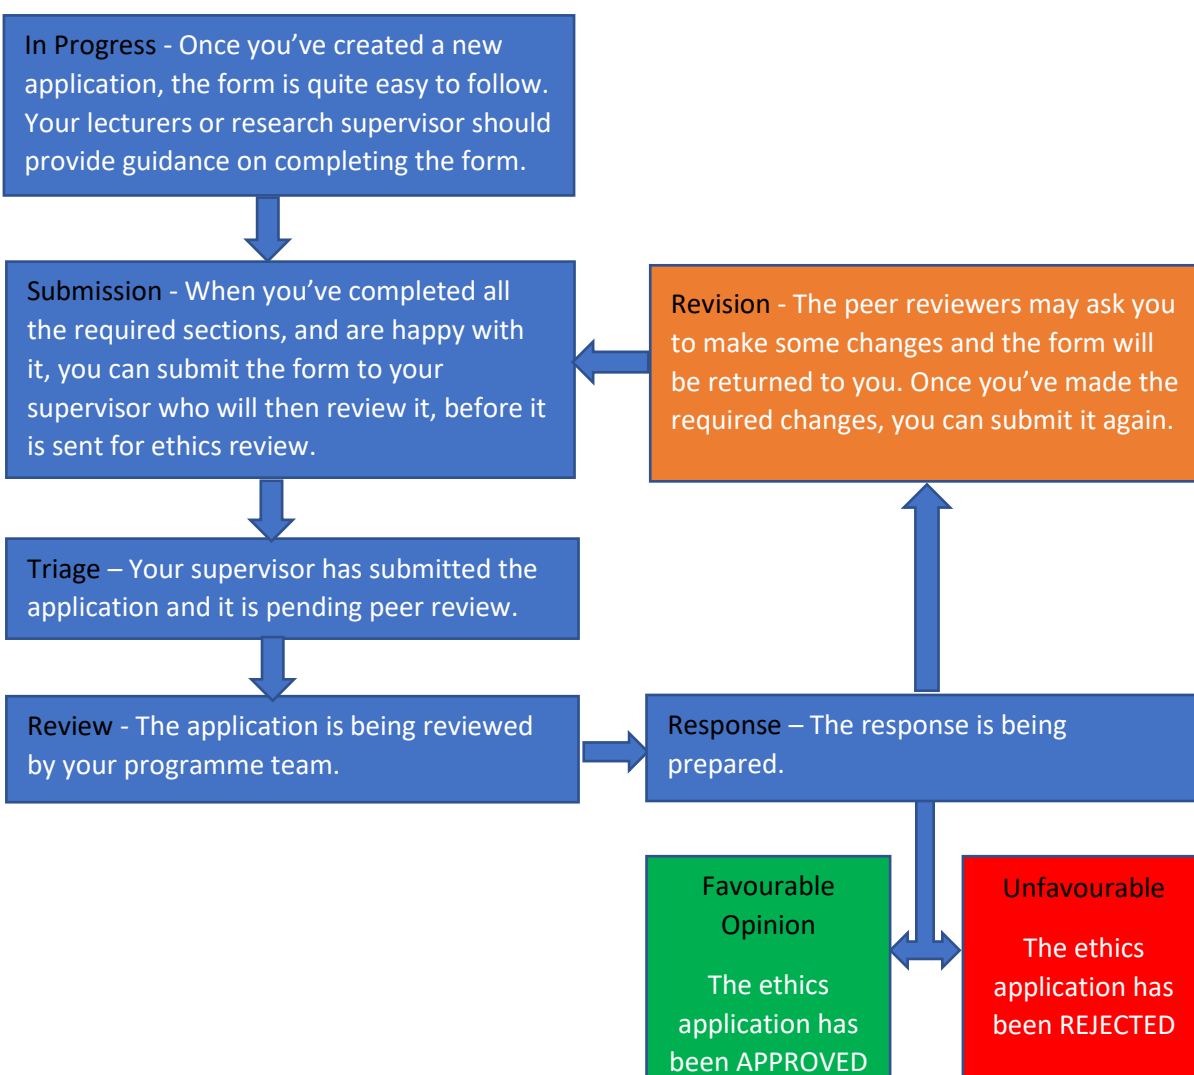

Research projects that involve human participants requires a favourable opinion from your Faculty's Research Ethics Committee. See the [Research Ethics Code of Practice](#).

Your lecturers will provide further details and help you understand the requirements.

Completing the [Research Ethics Screening Questions](#) with your supervisor can help decide if an ethics application is required.

If you need to apply for ethics approval please log into [Worktribe](#) using your P number and password. The diagram below guides you through the stages your ethics application. Step-by-step guides can be found in the [Help Menu](#) within WorkTribe. Scroll down to the bottom of the page to locate the **Quick Guide for UG & PGT Applications**.

You cannot start your data collection until you have received a favourable ethics opinion.

Once approved, it is important that you complete your research project as described in the application. If you want to do anything differently, you must discuss that with your supervisor. If you are doing research with ethics approval, it is important that you keep your supervisor up-to-date.
